Data Anlaysis: Location Code - Parks; Business/Location - Park Name; Address - Park Address

Data Abnormalities: Park Location Code frequently used for Parking Lots; Unable to determine location of occurrence at a park due to no or insufficient synopsis and/or misspelled park name(s); No data entered into the location code/business/location fields with a non-park address. All of these inconsistencies have resulted in difficulties capturing park data and in being able to determine if the CFS actually occurred within the "scope" of the parks after reading/analyzing each entry.
